Statement of Purpose

Name:Ouyang Yubo
Email:2022201462@ruc.edu.cn

From an early age, I have been fascinated by the power of knowledge to transform lives and societies. This curiosity has driven me to pursue academic excellence and seek opportunities to deepen my understanding of Economics. As I stand at the threshold of the next phase of my academic journey, I am eager to contribute to and benefit from the rigorous intellectual environment at Harvard University, where I hope to further develop my skills and make meaningful contributions to my field.

During my undergraduate studies in Economics and Mathematics at Renmin University of China, I developed a strong foundation in quantitative reasoning and data processing. Courses such as machine learning not only expanded my theoretical knowledge but also honed my analytical and problem-solving abilities. One particularly formative experience was my involvement in College Students' Innovation and Entrepreneurship Training Program, where I explored casual inference in daily economics activities . This hands-on experience allowed me to apply classroom concepts to real-world challenges, deepening my passion for Master of Financial Economics and solidifying my desire to pursue advanced studies.

Beyond academics, I have actively sought opportunities to engage with diverse perspectives and develop leadership skills. For instance, I actively engage in various lectures and discussions about frontier technologies. These experiences taught me the importance of collaboration, adaptability, and perseverance—qualities that I believe are essential for success in graduate school and beyond.

My decision to apply to Master of Financial Economics of Harvard University is rooted in its reputation for fostering innovation and excellence in Economics and Data Science. The opportunity to work with esteemed faculty members, whose research aligns closely with my interests in quantitative reasoning, excites me immensely. Additionally, the interdisciplinary approach and state-of-the-art resources offered by the program will provide the ideal platform for me to explore questions that intrigue me, such as solving real-worlds problems using quantitative models.

Looking ahead, I aspire to become an experienced researcher who can bridge the gap between theory and practice in Economics. By pursuing graduate studies at Harvard University, I am confident that I will gain the expertise and network necessary to achieve these aspirations while contributing positively to the academic community.

In conclusion, my academic background, practical experiences, and unwavering commitment to learning have prepared me well for the challenges and opportunities of graduate school. I am excited about the prospect of joining Harvard University and embarking on this transformative journey, where I hope to grow both personally and professionally. Thank you for considering my application.

Sincerely,
Ouyang Yubo
